Dana Harrison
Aquel Inc.

A couple months ago my plumber advised me that the Water Softener/Filtration system in my home was not suited for the well water in my district. I was having a number of issues with my Instant Water Heaters and some faucet valves. The plumber recommended Aquel Inc. who designs systems based on the needs of each user. Dana Harrison at Aquel Inc. asked me to furnish her the water report for my water district which I did. It was a detailed report which included all the minerals and their levels.

Shortly after that my custom designed Soft Water/Filtration system was installed. I'm happy to report the water tastes the best ever and the water feels wonderful in the shower. I am hoping my decision to switch to Aquel Inc. will pay dividends in the future in terms of less labor and replacement parts.
